ABOUT ME

I am a self-taught Software Developer who is passionate about self development and technology. With a wealth of skills from my previous career in banking, I bring a lot of transferable skills to the tech industry, and more recently commercial experience building full-stack web applications. I am currently completing my level 4 Software Engineering apprenticeship at a London based start-up company.

What started with a simple exploration of "Hello World" has become a fully-fledged passion that has influenced my career trajectory to date. I never want to stop learning and I would love to work in a collaborative environment where I am encouraged to grow as a full-stack developer.

WORK HISTORY

Junior Software Engineer

PersonifyXP

March 2021 to Present

As Junior Fullstack Software Engineer at a London based startup during my level 4 software engineering apprenticeship, my role involved:

- Working with a variety of different languages and frameworks such as JavaScript, Vue, Node.js, PostgreSQL etc.
- Client-side UI scripting using JavaScript
- Testing integrations using Jest
- Building complex web applications
- Working with Git versioning tools
- Debugging code errors
- Communicating and collaborating with a multi-disciplinary team of engineers, designers, clients, and stakeholders on a daily basis

Personal Banker

Santander

August 2016 to March 2021

The position required effective communication at all levels, as well as writing up reports for analysis on client accounts. I was expected to also collaborate with different departments within the business to achieve desired client outcomes.
